

## **Chemical Engineering Technical Electives Policy Revision** **(Effective August 30, 2017; Applies to 2010-12; 2012-14; 2014-16; 2016-18 catalogs)**

### **Revised\* Technical Option Area policy:**

- o Students may choose one or two Technical Option Area(s)
  - One tech area: 4 tech electives are required
  - Two tech areas: 2 tech electives are required in each area
- o At least two of the tech electives must be CHE courses
- o At least three of the tech electives must be engineering courses

### **Previous Technical Option Area policy:**

- o Students may choose one or two Technical Option Area(s)
  - One tech area: 4 tech electives are required
  - Two tech areas: 2 tech electives are required in each area
- o At least two of the tech electives must be CHE courses

\*Students who completely satisfy the non-ChE technical elective requirements of the previous policy with electives taken Summer 2017 or earlier will not have to take an additional engineering elective course.

### **SELF CHECK**

You are a CHE student in any catalog. Envision yourself in August after all of the Summer 2017 grades have been posted. Have you completed at least your 2 non-ChE technical electives according to the previous policy?

If yes:

You will meet graduation requirements and do not need to be concerned about an additional engineering course.

If no:

You will need to follow the revised policy.

**Updated: February 16, 2017**
